

Science Project Research

Last Name _____, First _____ per _____

The research assignment is part of your ongoing science. Choose a topic and do some internet research, (*minimum 3 paragraphs*). Do this before you start your actual experiments for your science project. The requirements for research are:

1. Choose a science project topic
2. Come up with 4 or 5 general questions about your topic.
3. Go to the internet, or other type of reference and look up your topic. Try to find the answers to your questions. Take notes and look for other interesting facts that you discover about your topic. Keep in mind that you will be designing an experiment to test some aspect about your topic, so look for information that will help in this endeavor.
4. Summarize your notes into 3 or more paragraphs, Use the skills you learned in Core class to write your paragraphs. Include a topic sentence and supporting details. (No copying information word for word from the internet. Don't include anything that you don't understand.
5. Cite all the websites and references you used in the research.

What is your general topic? _____

Write 4 or more questions you have about your topic

Answers and Facts notes: (Use both side of paper)
