

Disease Pamphlet

Your assignment is to design a pamphlet that will educate others about a certain disease. Your pamphlet must be six pages (I will demonstrate in class how to fold paper to make a pamphlet). You will choose a disease and research at home or school.

The following **required items** must be included:

- **Name** of the disease
- **Cause** of the disease
- **Symptoms** of the disease
- **Transmission** of the disease (infectious, noninfectious, how people get this disease)
- **Prevention** of the disease
- **Treatment/cure** of the disease

Each required item should be on a separate "page" of your pamphlet.

The name of the disease should be on the front page, but the rest of the required items may be put in any order you wish.

Timeline:

Mon 3/31

Tue 4/1

Wed. 4/2

Thu 4/3

Final touches Final Draft

pamphlet is **DUE!!**

Grade:

In order to receive a C, you must have all of the "required items" in the pamphlet and it must be turned in Fri., 4/4.

To earn an A or B grade:

- Add extra information such as interesting historical facts, statistics, etc; this information could be included on the front page or added at the bottom of another page where you think it fits
- Make it *very neat*, using your best hand writing or typing it on a word processor
- Add illustrations, charts, etc.
